Eat Seafood America! to make your life healthier, to make meals simpler, and to support working waterfront communities.

Eat Seafood America!, an initiative aimed at helping Americans stay healthy during the COVID-19 crisis as well as help boost the seafood economy, has been successful in encouraging consumers to eat more fish and shellfish. Of consumers surveyed, those who reported seeing the Eat Seafood America! messaging were three times more likely to have increased their seafood consumption in the previous two months.

Spurred by the Seafood4Health Action Coalition of more than 40 organizations, this unified consumer outreach campaign earned nearly 300 million potential impressions in the first 16 weeks.

The Coalition Communications Subcommittee has worked collectively to create relevant and engaging messaging for September and October, National Seafood Month, focusing on education and simple approaches to increasing seafood consumption.

Five messaging themes have been designed to demonstrate how you can share Eat Seafood America! with your audience, and while they can be used anytime, we have suggested a timeline for use. Please utilize the turnkey resources and messaging, or work with us to customize it.

Magic happens during family mealtime when children and parents gather around the table and engage each other in conversation. Regular family meals are linked to the kinds of outcomes we all want for our children: higher grades and self-esteem, healthier eating habits and weight, and less risky behavior.

Making and eating dinner at home is one way families can stay connected and share their daily experiences while enjoying a nutritious meal. Getting kids involved in cooking makes them feel proud of helping and more likely to eat wholesome foods.

Fish and shellfish are good options for busy nights. Most seafood can be cooked in 15 minutes or less. Additionally, fish and shellfish are sources of lean protein, low in saturated fat and rich in vitamins and minerals, most notably the omega-3 fatty acids EPA and DHA. The Dietary Guidelines for Americans and American Academy of Pediatrics both recommend at least two servings of seafood per week to support heart and brain health.
EAT SEAFOOD, AMERICA TO SUPPORT WORKING WATERFRONT COMMUNITIES AND LOCAL BUSINESSES THROUGH THESE UNPRECEDENTED TIMES.

Fishermen and seafood farmers work hard to provide us with sustainable, delicious food. Let’s show support and #EatSeafoodAmerica! Purchase seafood online or from your retailer to cook at home, or order from your favorite restaurants for delivery or pick-up.

How can we support fishermen & seafood farmers so their businesses can thrive (and adapt) during these extremely difficult times? #EatSeafoodAmerica! It’s that simple. #eatmoreseafood

Many fishermen, farmers and distributors have shifted to online deliveries to help get healthy seafood to Americans. Help support these local businesses. [LINK to business or directory] #EatSeafoodAmerica #backtowork

Support fishing communities during these trying times. Here’s advice on how from @aragostamama: If you want to support fishermen and eat sustainable seafood start by learning about when different types of seafood are available, ask for fish that is caught and landed by American fishermen, and eat a variety of seafood. #EatSeafoodAmerica #fishermen #sustainableseafood

Oysters are tasty, nutritious & help the environment! Learn more the important role this shellfish plays in ocean ecosystems. [LINK to video: Ocean to Table: South Carolina - Lady’s Island Oyster Inc. OR Ocean to Table: California – Hog Island Oyster Company]

Seafood is good for you and good for the planet, too! #LearnMore about sustainableseafood https://www.seafoodnutrition.org/sustainable #EatSeafoodAmerica

FishWatch is the nation’s database on U.S. managed sustainable seafood, helping you make smart seafood choices. Search for up-to-date information on the status on U.S.-harvested and farmed seafood.

The U.S. is a global leader in sustainable seafood thanks to a rigorous science-based fisheries management process that supports the goals of sustaining fish populations, protecting habitat and other species, and keeping fishermen on the job.
Fall Fish Favorites
Seasonal seafood paired with the autumn harvest

AS PEOPLE SEEK COMFORT — AND COMFORT FOODS — DURING THIS DIFFICULT TIME, IT IS A PERFECT OPPORTUNITY TO HIGHLIGHT SEAFOOD PAIRINGS WITH FALL HARVEST FLAVORS

SAMPLE BLOG POST

Seasonal Celebration: Seafood Comfort Food
Enjoying these (socially-distanced) autumn days means for many people picking apples or visiting a pumpkin patch. Just as the old adage says, “If it grows together, it goes together,” it is especially true this time of year as the fall harvest flavors pair perfectly with seasonal seafood offerings. A great example is this Pumpkin & Spinach Risotto with Scallops recipe. For a fish sandwich with the perfect fall crunch, try a pumpkin seed-crusted fish sandwich. Or, as temperatures drop, a nice bowl of New England Clam Chowder (or your favorite regional variation) can’t be beat.

WHAT’S IN SEASON?
Highlight the fall “harvest” and fishing season together puts the spotlight on the freshest seafood available:

- Clams
- Cod
- Crab
- Flounder
- Haddock
- Hake
- Halibut
- Maine Lobster
- Mussels
- Oysters
- Pollock
- Salmon
- Scallops
- Swordfish

School at Home Means Kids in the Kitchen
There are so many reasons to get your kids cooking. When kids cook, it boosts their self-esteem. They learn real lessons in math, science & creativity. And, it creates a great opportunity for family bonding. Studies show that when kids help to make the food, they are much more likely to try eating new things. Here are some great kid-friendly recipes to get you cooking: https://www.seafoodnutrition.org/little-seafoodies-recipes/ #EatSeafoodAmerica #littleseafoodies #kidsinthekitchen

SAMPLE BLOG POST

Quick, Easy Weeknight Meals
Life can be complicated, especially during these times. Meals can be simple with seafood.

We are here to take the stress out of planning and preparing family meals.

Need a quick recipe? Many fish dishes can be made in 15 minutes or less. Plus, if you didn’t plan ahead, seafood can be cooked from frozen! Check out the six easiest ways to cook fish at home.

Good rule of thumb: Try the 10-minute rule, which says you should measure the fish at its thickest point, and cook it on medium-high for 10 minutes per inch, turning halfway through the cooking time. #EatSeafoodAmerica

Good rule of thumb: Try the 10-minute rule, which says you should measure the fish at its thickest point, and cook it on medium-high (think 375) for 10 minutes per inch, turning halfway through the cooking time. That means a thin fish like sole or perch cooks in about 4-5 minutes while a thicker salmon or tuna steak might be closer to 15 or more minutes. The best way to tell if your fish is done is by testing it with a fork at an angle, at the thickest point, and twist gently. The fish will flake easily when it’s done and it will lose its translucent or raw appearance.

Want a cheat sheet for seafood prep? Here is a printable Ultimate Guide to Cooking Seafood.

SEAFOOD 101: EASE OF COOKING

With new consumers trying seafood at home, it’s important to support them with new recipes and tips to make sure those continued purchases result in delicious meals. How can we make meal prep and cooking easier? Here are some topics you can highlight:

• Simple techniques for cooking seafood
• 1-3 minutes cooking videos
• 3- or 5-ingredient recipes
• Cook from frozen
• Foil packets or one-pan dishes
• Retail pre-seasoned or cooked options
• Tinned and smoked products
• Simple storage techniques
Live Healthier with Seafood
Seafood can lift you up during these trying times

**IMMUNE HEALTH**
- Now, more than ever, people are looking for ways to “boost” their immune system. Seafood, both fish and shellfish, provides essential nutrients to the body that support immune health.
- Seafood is a nutrient-packed food that reduces inflammation with vitamins A, B, and D, as well as omega-3 fatty acids and minerals such as calcium, selenium, phosphorus, iron, zinc, iodine, magnesium, and potassium.
- Zinc helps the immune system fight off invading bacteria and viruses, and is found in abundance in oysters. Other shellfish such as crab and lobster as well as some fish like sardines, salmon, flounder, and sole are good sources of zinc.
- **BLOG POST:** Support Your Immune Health by Eating a Variety of Seafood
- **SOCIAL POST:** Seafood helps support your immune health. Good nutrition is essential to support a strong immune system, and seafood is nutrient-packed with antioxidants and anti-inflammatory vitamins, minerals such as selenium, iron and zinc, and omega-3s. [https://www.seafoodnutrition.org/seafood-101/support-your-immune-health-with-seafood #EatSeafoodAmerica #immunehealth](https://www.seafoodnutrition.org/seafood-101/support-your-immune-health-with-seafood #EatSeafoodAmerica #immunehealth)

**STRESS & ANXIETY**
- When we are depressed or anxious, we naturally resist self-care, including preparing and eating nutritious food. But good nutrition is more important than ever for those suffering from depression. Research shows that our daily food choices influence our mental health, and evidence is strong that seafood is brain food.
- **SOCIAL POST:** Seafood has the vitamins needed to boost your mood and calm your mind. #LearnMore [https://www.seafoodnutrition.org/seafood-101/health-tips/seafood-is-brain-food-anxiety-stress #EatSeafoodAmerica](https://www.seafoodnutrition.org/seafood-101/health-tips/seafood-is-brain-food-anxiety-stress #EatSeafoodAmerica)
- **SOCIAL POST:** Fish is like a multivitamin for your brain. Fish is more than just an excellent source of lean protein and essential omega-3s, it provides other vitamins & minerals important for mental health. The nutrients that tend to be low in people who are depressed – #vitaminD, magnesium & zinc – are found in #fish. Peak Nutrition for Seasonal Seafood
Seafood is not just filled with omega-3s, it includes vital nutrients optimal for overall health and wellness, such as selenium, iron, vitamin B-6 and B-12, and protein. With so many great seasonal seafood options to choose from, they each offer a unique nutrient profile. Here are a few highlights in sharable social post format:

**CLAMS** have more vitamin B-12 per serving than any other food — 1,868% of the daily value, to be exact. B-12 keeps nerves and blood cells healthy, balancing mood and fighting fatigue.

**COD** is one of the leanest proteins available, meaning the protein to calorie ratio beats out any other food.

**HADDOCK** is a popular option for fish and chips (just choose baked to retain the nutrients!) because of it’s light, slightly sweet flavor. It’s also full of B vitamins — B-6 and B-12, niacin, thiamin, riboflavin and folate — as well as more than 50% DV of immune-boosting selenium.

**CRAB** is prized for its sweet flavor and tender, flaky meat, and is a rich source of zinc and copper.

**MAINE LOBSTER** is a tasty way to get a boost of thyroid-boosting iodine. A 100-gram serving of the crustacean provides 100 micrograms of the essential mineral, or 67% of the recommended daily intake.

**OYSTERS** are an immune-boosting super food with 32 mg, or nearly 300% DV, of zinc in just 6 medium oysters. They are also pumping iron: a serving has about 50% of your daily needs.

**ALASKA POLLOCK** boasts a whopping 27 grams of protein in just 127 calories, and even though it’s so lean, has more than 500mg of essential omega-3 fatty acids EPA+DHA per serving.

**SARDINES** boast 43% of your daily value of calcium, because of the tiny, edible bones, plus another whopping 169% of your daily vitamin B-12, 85% of selenium and 56% of phosphorus.
